

.....Beyond Kitchens

Beyond kitchens..

OUR VISION

To deliver service of the highest standards, providing value addition to our clients.

We understand that any company can supply and install equipment. But we go beyond that. We are not suppliers—we are your partners in your quest for excellence.

Which is why our capabilities span from planning and design of commercial kitchens to fabrication of steel equipment to commissioning turnkey projects.

Our in-house design and conceptualizing team takes pride in its work, which is complemented by the expertise our fabricators and technicians. Not only do they put life into new designs, they also ensure prompt maintenance of existing equipment.

From a small restaurant to large kitchens in five-star hotels and beyond, we bring the same commitment to every project.

Our range of services

- Planning and design of commercial kitchen layouts
- Supply, installation and commissioning of commercial food service equipment
- Refrigeration and cold storage equipment (walk-in chiller and freezer)
- Custom fabrication of stainless steel equipment
- Turnkey projects

Talk to us today!

For all your requirements of kitchen and food service equipment, contact us. We will provide you with consulting as well as commissioning services, delivering value addition every step of the way.
